Christian Meza   Front-End Developer

Email: chriszfrontend@gmail.com **Phone:** 619-382-6827. **Website:** https://chriszdeux.github.io/portfolio-app
GitHub: github.com/chriszdeux   **LinkedIn:** https://www.linkedin.com/in/christian-meza-front-end/

Experience

Call City: In this company my main role was as a frontend, working with HTML, CSS3 and Foundation. The main task was to keep the site visually accessible for the workers who used the system. I also sometimes gave maintenance to the company's equipment.   Start-date: November/2013 – End-date: February/2014.

Ochoa: In this company I was in charge of systems, my main task was to keep the system working in optimal conditions, as well as in charge of the editions that will be needed on the company's website using Bootstrap 3 for the visual aspect. I also performed network equipment configuration tasks such as switches, routers, cabling and solving constant problems that my boss had outside the country.   Start-date: April/2014 – End-date: November/2016.

Community: I was in a community of developers called Hacker Garage located in Guadalajara Jalisco MX, where I learned in a more general way how other fields work.
I was involved in small startups that were starting and although many failed to grow beyond planning, I had very good experience working with other teams.
I learned to manage design programs, graphic engines and I saw more closely what other fields were like and that's where I decided to focus on the Frontend.
        All year 2016

Inkfluencer: I'm currently working on a Startup called Inkfluencer which is focused on the world of NFT's. My role is as a frontend developer using technologies like React and Material UI.
Start-date: March-2022

Education

IT technician:
        Specialized in computer technology
        2003 – 2004 / GDL-MX

Graphic Design:
        Graphic Design
        2004 – 2005 / GDL-MX.

Information Technology:
        Technological University of Jalisco
        2010 –2011 / GDL-MX

Engineering Developing Games:
        University of Digital Arts
        2011 – 2012 / GDL-MX

Projects

Crypto Ant
        Website to teach people the world of cryptocurrencies
        Link:

Others
- ✓ Critical Thinking
- ✓ Friendly, Positive Attitude
- ✓ Organizational Skills
- ✓ Conflict Resolution
- ✓ Spanish / English
- ✓ Problem Resolution
- ✓ Attention to Detail

Skills I've worked with:
- ✓ **HTML5:**   Maintaining the use of the appropriate tags.
- ✓ **CSS3:**   Styling and positioning using flex-box, grid. Also, the use of media-queries for responsive   handling and the use of animations and transitions.
- ✓ **JavaScript:** ECMAScript 6+, OOP, Closures, Scope, Async Await, REST API.
- ✓ **TypeScript.**
- ✓ **SASS:**   Variables, Nesting, Partials, Modules, Mixins, Extend/Inheritance and Operators.
- ✓ **ReactJs:** Functional components, use hooks like: useState, useEffect, useMemo, useCallback, useReducer, useRef, react-router, context, react-redux and custom hooks.
- ✓ **Node Js:** As a backend for integration with my frontend, resolving errors, maintaining status codes, microservices and giving routes to my endpoints.
- ✓ **MongoDB.**
- ✓ **Express.**
- ✓ **Dev-Tools:** Chrome-dev-tools to debug my code, have a status of my project and have a bigger   picture when I get an error.
- ✓ **NPM.**
- ✓ **Deploy Projects:** with GitHub pages and Heroku, both front and backend.
- ✓ **REST API.**
- ✓ **Source Code Control:** git/GitHub.
- ✓ **Material UI, Bootstrap, Styled Components.**
- ✓ **Terminal**
- ✓ **Linux, Windows.**

Basic knowledge of:
- ✓ Photoshop.
- ✓ Illustrator.
- ✓ Land creation with graphic engines as Unreal Engine 3 and Unity 3D.
- ✓ Maya
- ✓ Game design.
- ✓ Video edition.

My Hobbies
- ✓ Lecture.
- ✓ Walk in the evenings with my wife.
- ✓ Watch animes with good narrative stories.
- ✓ Investments, in special cryptocurrencies.
- ✓ I love dogs (I have 3)
